

Mining Incentive Program Acknowledgment of Compliance

The following checklist must be included with all Mining Incentive Program (MIP) applications to ensure applicants understand that their projects must meet all legal and regulatory requirements set out in the NWT. This includes permits from all relevant project regulators, legal compliance, and compliance with any applicable Public Health orders issued by the Chief Public Health Officer (CPHO). In addition, projects that receive MIP funding must remain compliant with all program and funding agreement requirements during the period for which funding has been awarded.

CPHO Compliance

I understand that proof of compliance with any applicable CPHO orders and guidelines may be required before funds are released.

I understand that in the event of changes to CPHO requirements, my project will still need to demonstrate compliance.

Legal and Regulatory

I understand that it is my responsibility to ensure that all required permits for the project are duly acquired and that the project will comply with all applicable laws and regulations.

MIP Requirements

I understand that my program must meet the requirements outlined in the MIP Guidelines and in any contribution agreement provided for my project.

I understand that my program must provide appropriate application and reporting materials.

I understand that the MIP administrators have full discretion over the interpretation and application of MIP policies and guidelines including project eligibility criteria, project evaluation and scoring, project reporting requirements, and the awarding or withdrawal of MIP funding.

I understand that I must respond to any communication from MIP administrators in a timely manner and provide project updates, reporting, proof of compliance, or other information requested by the administrators within a reasonable time frame.

I understand that if I fail to demonstrate compliance with any program requirements, including those outlined above, my project may become ineligible for MIP funding. In some circumstances, this may require the return of awarded funding.
